

Proposed Amendment to Recommendations on Lecturers - Alan Friedman

We request the Administration to authorize up to five additional tenure-track lines (over and above replacement of losses) each year beginning with 1984-85 recruitment. This policy will be reviewed during its third year and every subsequent year that it remains in effect, and continued only if it is achieving its two desired ends: that of improving the quality of the regular departmental faculty and that of decreasing the number of Lecturers hired by the Department.
